Tabatha,

The domain invoice was inadvertently left off the May c4 report in the flurry of getting the candidate registered on the PDC after filing week. It was not a malicious omission, but purely accidental as the website has not been built yet and wasn't top of mind. The candidate was able to forward me the invoice early this morning, so I have it, but I am unsure how to proceed. Should I just file an amended C4 report for May? I haven't dealt with a violation before and want to make sure I am taking the correct steps to quickly rectify the situation.

Thank you for your help.
