Hi Tabatha,

Please find my response to the alleged violation(Case Number **140318**) below:

Thank you for bringing this to our attention. Following the receipt from the PDC, we checked with our designer/printer and they let us know that it was in fact 8 point used. The printer initially believed that as different font types appear smaller or larger than others that we were in compliance. This was not intentional nor was it to mislead, we did our best due diligence at the time and made sure to include the disclaimer as required. We are no longer using the old brochures and are reprinting the literature with 10-point font to be in compliance with RCW 42.17A.320(3)(a).

The disclaimer is on the literature and the "Katey Treloar" name is prominently displayed throughout the piece, highlighting that there was no intention to mislead the sponsor identification.

We did additional due diligence and confirmed with the printer that the rest of the mail that was sent out in the Primary Election displayed an 11-point font disclaimer.

Thank you for your understanding. Please respond so I know that you received this email.  
Katey Treloar
