Dear PDC.

I think this is response #3 and hopefully I've answered everything.

Good afternoon PDC, so sorry that I sent my first reply without a photo of the notice.

I have a once a month JENI Listens listening meeting with my constituents.

My City of Gig Harbor told me that I could invite my email list to a meet the candidate as long as I did not use city equipment, did not use a city email address, did not mention the meeting in any city function. The city clerk did say I could use the same JENI Listens title.

Did I use any staff? No

Did I use any city equipment or resources ? No

Did I use any emails? Long before I was on council I was part of a group, interested in city things, and my email list was about 2,000 emails all interested in city things. That is the vast majority of addresses I used. This list was before I became a council member. I don't recall if any of the addresses came from outside my personal email list. A couple of times I tried to add to my personal list and I was told the email was already on my personal list.

I was never told to watch out for personal email addresses as my emails are mostly personal.

You will notice it is a different background for JENI Listens meet Ed Nadler.

Attached is a notice I put on the table on the JENI Listens Ed Nadler. I also spoke the announcement before the meeting began.

I did everything as directed by my Gig Harbor City Clerk Josh Stecker.

If you have questions please do not hesitate to contact me.

Thank you,

Jeni Woock
