Good Morning Erick

I was experiencing some problems with how our Committee was appearing on the PDC site and wrote to the PDC in December speaking with Devin and again in February speaking with Ladelle by phone and by email. In my email I asked and shared two concerns that I needed help with. First of which was the annual or recurring status of our committee, secondly I mentioned that our opposition was wanting to see our finances and I thought that was all done as a function facilitated through the PDC. I was unaware of **RCW 42.17A.235** and told Ladelle that our opposition was wanting access to our information and I did not understand why it was not visible and available through the PDC as the intermediary. Ladelle did a fantastic job of working with your IT department and helping with some corrections to our committee. I assumed that if I had an obligation that Ladelle would have referred me to the guidelines within **RCW 42.17A.235**. I am not trying to shift blame to Ladelle because she was wonderful and I wrote an email to the PDC following our interactions to share how wonderful her customer service skills were, but that question of how the opposition is to access information by way of the PDC got missed and was left unanswered.

In all of my communication with the PDC I have expressed that I am unfamiliar with the details and was needing assistance and clarification to make sure I am doing things right because that is my intent and desire.

I asked the question of the PDC on the 8th and the election was on the 13th.

Please advise what more information you need in response or what course of remedy the PDC suggests or requires at this point.

Thanks
Shannon
