Hello Micah,

Since I first responded on the 21st I have some additional information.

The lab coat worn by Dr. Lawrence is his own. He bought it about 25 years ago.

Leah Layman is wearing her own lab coat

Dr. Haycox is in England so I can't verify this but I suspect her lab coat is her own since it is embroidered with her name.

If that is true then the only violation would be Dr. Murphy's ID badge, which is not legible and does not identify the hospital.

Again, there was no intent to insinuate support by the hospital, only by the individuals pictured in the photos and identified.

Sincerely,

Bruce McComas
