Phil,

Thank you for your letter. I had the signs designed per regulations. The sign actually does have "Paid for by Voters for Jim Kastama 418 8th Ave Puyallup, Wa 98372" on it in 10 pt font. Although you can read it, the sign printer cut a little too much off the bottom, making it harder to see. I will order a "patch" that makes this more clear and apply to all signs asap. Hopefully I can have this done before the October 2 deadline. I will keep you informed of the status.

Best,

Jim Kastama

Phil,

I have examined my signs and will address this issue in the following manner. Hopefully this will answer any issues in the complaint.

First, many of the current signs have the letters fully exposed and readable. These signs may be cut very close to the bottom of each letter but the letters are still whole. I will leave these signs as they are compliant with current regulations, including size requirements.

Second, there are other signs, however, that the sign printer "cut" into the letters, making them not as easy to read. For these signs I will begin immediately replacing them with brand new signs that have the required information clearly marked. Adequate space was made so that the printer could not cut into this information.

Any signs removed due to letters being cut too closely will be repaired and redeployed.

Please call me with any questions.

Best,
Jim Kastama
