Thank you for the opportunity to respond to this complaint.

The below guidance is what our campaign has been utilizing during this and previous campaigns.

Public availability of photos: Photos taken during normal public business, such as routine events or meetings, may be made available to campaigns on the same terms and conditions as they would be to any other member of the public. However, the photo cannot have been staged specifically for campaign purposes, and the photo's use must not be interpreted as government endorsement.

Photos used by my campaign are publicly available, and were not staged for campaign activity. Any photos that had on duty law enforcement or fire fighters were in error, and have been removed.
